EXTREME COLD WEATHER CAPABILITY

Operating in the extreme cold will test a soldier like nothing else. Reduced daylight, restricted visibility, and significant challenges to mobility, partnered with the ever-present risks of frostbite and hypothermia, make cold/dry regions the most formidable of military environments.

Success in any setting can hinge on split-second decisions, but this is especially true of the extreme cold. These harsh conditions will push an individual to their limit, demanding resourcefulness, adaptability and an unwavering focus, simply to navigate the elements. The equipment in this workbook will enhance a soldier's operational effectiveness, allowing them to deliver kinetic effect and dominate the ground whilst keeping them agile, comfortable and safe.

In an environment where the odds are stacked against you, having the right clothing and equipment is an absolute non-negotiable. The cornerstone of operational effectiveness, high-performance equipment can propel a soldier to peak capability. By addressing the unique environmental challenges posed by the extreme cold, our range of Extreme Cold Weather (ECW) solutions will equip each soldier with the security that they need to perform at their best.

HARDSHELL

When operating in the extreme cold, protection from the weather is essential. Hardshell garments made from the latest fabric technology provide lightweight durability and water resistance to equip the wearer to withstand the Arctic elements.

The right hardshell clothing offers water and wind resistance whilst allowing water vapour to escape, keeping the wearer dry and comfortable even in the harshest conditions.

ALLIES MOUNTAIN II JACKET

Brand: Outdoor Research
SKU: 322588 (Multicam®Original 322643)

The Allies Mountain Jacket offers fully-featured technical weather protection in a durable, fabrication built to withstand the most challenging conditions.

GLOVES/ MITTS

Gloves and Mitts are a critical piece of protective equipment for military personnel operating in the extreme cold. Hands are highly susceptible to frostbite, and even a slight limitation to movement as a result of the cold can hinder performance, with potentially dangerous consequences.

Our military-specific gloves are designed with warmth, dexterity and grip in mind, ensuring that soldiers can operate vital bits of equipment and aren't limited by their environment.

MT BAKER II GORE TEX MITTS

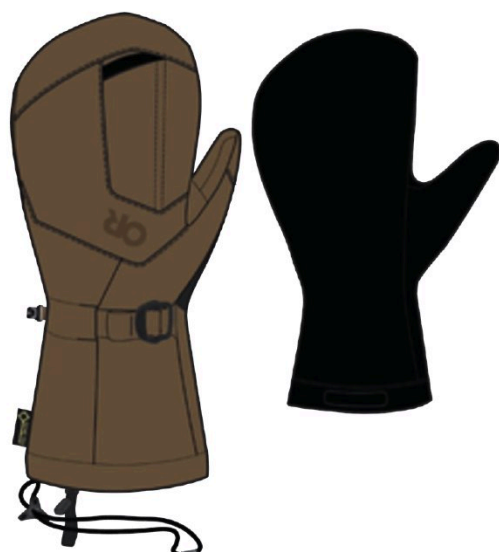

Brand: Outdoor Research
SKU: 300809

MOBILITY

FOOTWEAR

The right footwear is of paramount importance when operating in extreme cold weather environments. The only surface in contact with the ground, effective foot insulation is essential for ensuring that the wearer stays warm in sub-zero temperatures.

Our mobility solutions cover ski march boots, mountain boots, and technical ski boots, providing exceptional grip and guarding against snow and moisture infiltration to help with perseverance through the cold.

POLAR A/P/S EXPEDITION SKI BOOT

Brand: Alfa
SKU: Tbc

An extremely comfortable BC-boot with an integrated gaiter that is reinforced with Kevlar on exposed areas. Developed specifically for expeditions and long journeys on skis in extremely cold conditions. Polar A/P/S also has a specially developed last that ensures you have room for liner. It also has extra insulation within the sole.

DESIGN FEATURES

- An anatomically designed insole made from insulating felt and breathable materials help keep feet warm and dry
- Plastic heel reinforcements provide better support
- Extra layers of full grain leather help protect the lower part of the boot in expected high wear areas due to possible snow crust
- Rubber coated reinforcement protects the boot from abrasion
- Gaiter Height: 44cm (EU 42)
- Shaft Height: 19.5cm (EU 42)
- Gaiter Material: Cordura with Kevlar reinforcement on exposed areas
- Sole: Rottefella BC
- Binding Compatibility: Rottefella Backcountry Magnum Binding
- Weight: 995g (per Boot EU 42)
- Liners Sold Separately

ALTA VIA TACTICAL GV

Brand: Asolo
SKU: B01076

One piece water-resistance Perwanger leather offers protection and comfort, while the Gore-Tex Insulated Comfort Footwear lining guarantees insulation, waterproofness and breathability. The outsole package consists of a Pu frame that guarantees stability, rigidity and cushioning, while the Asolo/Vibram Vertical sole has a self-cleaning design and offers maximum support, grip and torsional stability adaptable for the automatic crampons.

DESIGN FEATURES

- Upper: Water-resistant Perwanger leather mm 2,2-2,4
- Lining: Gore-Tex Insulated Comfort Footwear
- Lasting Board: Duo Asoflex Ascent in nylon loaded with fiber glass + Eva cover
- Anatomic Footbed: Lite 3
- Sole: Asolo/Vibram Vertical + Pebax Frame + PU Anti-Shock insert
- Fit: Man
- Weight: 987 (g) (1/2 pair size 8 UK)
- Size: 7-12.5 UK
- Made: in Europe
- Sustainability: The leather meets the standard by Oeko Tex.

ARCTIC GV

Brand: Asolo
SKU: B12540

Its water-resistant suede and high-tenacity nylon offers comfort, protection and stability; the Gore-Tex Insulated Comfort Footwear lining guarantees insulation and waterproofness. The outsole package is made of a mono density Eva midsole which gives stability, cushioning and comfort while the Vibram Ghiaccio rubber outsole is design with a self-cleaning design and thanks to the use of the Arctic Grip compound offers extreme grip on cold, icy and snowy surfaces. To complete the model a Pu rand all around for the maximum protection and the webbing lacing system for a fast and precise lace up. For giving better security we added also the RECCO Rescue System Technology for being always searchable.

DESIGN FEATURES

- Upper: Water-resistant suede and high tenacity nylon
- Lining: Gore-Tex Insulated Comfort Footwear
- Lasting Board: Asoflex 00 SR
- Anatomic Footbed: Lite 2 Alu
- Sole: Vibram Ghiaccio rubber outsole with Arctic Grip Compound (rubber-mono density Eva)
- Fit: Man
- Weight: 576 (g) (1/2 pair size 8 UK)
- Size: 7,5-12 UK
- Comfort Range: - 20°C
- Made: in Europe
- Sustainability: Contains leather from a tannery rated by the Leather Working Group (LWG)

MAESTRALE TACTICAL

Brand: Scarpa
SKU: 12053-TAC/1

DESIGN FEATURES

- Dual-density Pebax® Rnew Web Frame shell delivers on uphill and downhill performance
- Pebax® Rnew Evo V-Frame Cuff with venting
- Axial Alpine Evo tongue blends overlap power and cabrio style entry
- Speedlock Plus Ski/Walk mechanism is friction free and rock solid
- Wave Closure System provides a lightweight and secure closure
- RECCO® Technology for added avalanche searchability
- Last : 101mm
- Flex : 110
- Forward Lean : 16° +/- 2°
- Ski/Walk Mode : Speed Lock Plus
- Binding System : TLT, AT
- Weight: 1440g (1/2 pair size 27)

EXPEDITION GUIDE 75

Brand: Lundhags
SKU: 1040439-900

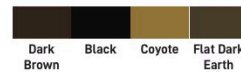

DESIGN FEATURES

- Made for telemark binding
- Ski touring boot with high shaft
- Vibram NN75 outsole with a TPU toe cap
- Removable inner liner made from 5 mm wool felt with HFC™ heel grip
- For wire bindings only, not for 3-pin attachment
- 5mm thick felt inner boot
- Inner built in heel grip
- Easy to dry and exchange during your journey

FUGITIVE TACTICAL

Brand: Outdoor Research
SKU: 22010

DESIGN FEATURES

- Upper: Water-resistant suede 1,6-1,8 mm and high tenacity nylon
- Lining: Gore-Tex Performance Comfort Footwear
- Lasting Board: Duo Asoflex man
- Anatomic Footbed: Lite 2
- Sole: Asolo Syncro (rubber-pu)
- Fit: Man
- Weight: 693 (g) (1/2 pair size 8 UK)
- Size: 6.5-13.5 UK
- Made: in Europe
- Sustainability: Contains leather from a tannery rated by the Leather Working Group (LWG).

OUTBACK BC 2.0

Brand: Alfa
SKU: Tbs

Black

DESIGN FEATURES

- ALFA Double Lock System to ease individual adjustment and bettering stability in descents
- New stable inner boot is equipped with flex zones for comfortable skiing
- Thermal insulating midsole to keep your feet dry and warm
- Gaiter Hight: 42cm (EU 42)
- Shaft Height: 17.5cm (EU 42)
- Gaiter Material: Cordura with GORE-TEX lining and Kevlar reinforcement
- Sole: Rottefella BC
- Binding Compatability: Rottefella Backcountry Magnum Binding
- Weight: 995g (per Boot EU 42)

SNOW MOVEMENT

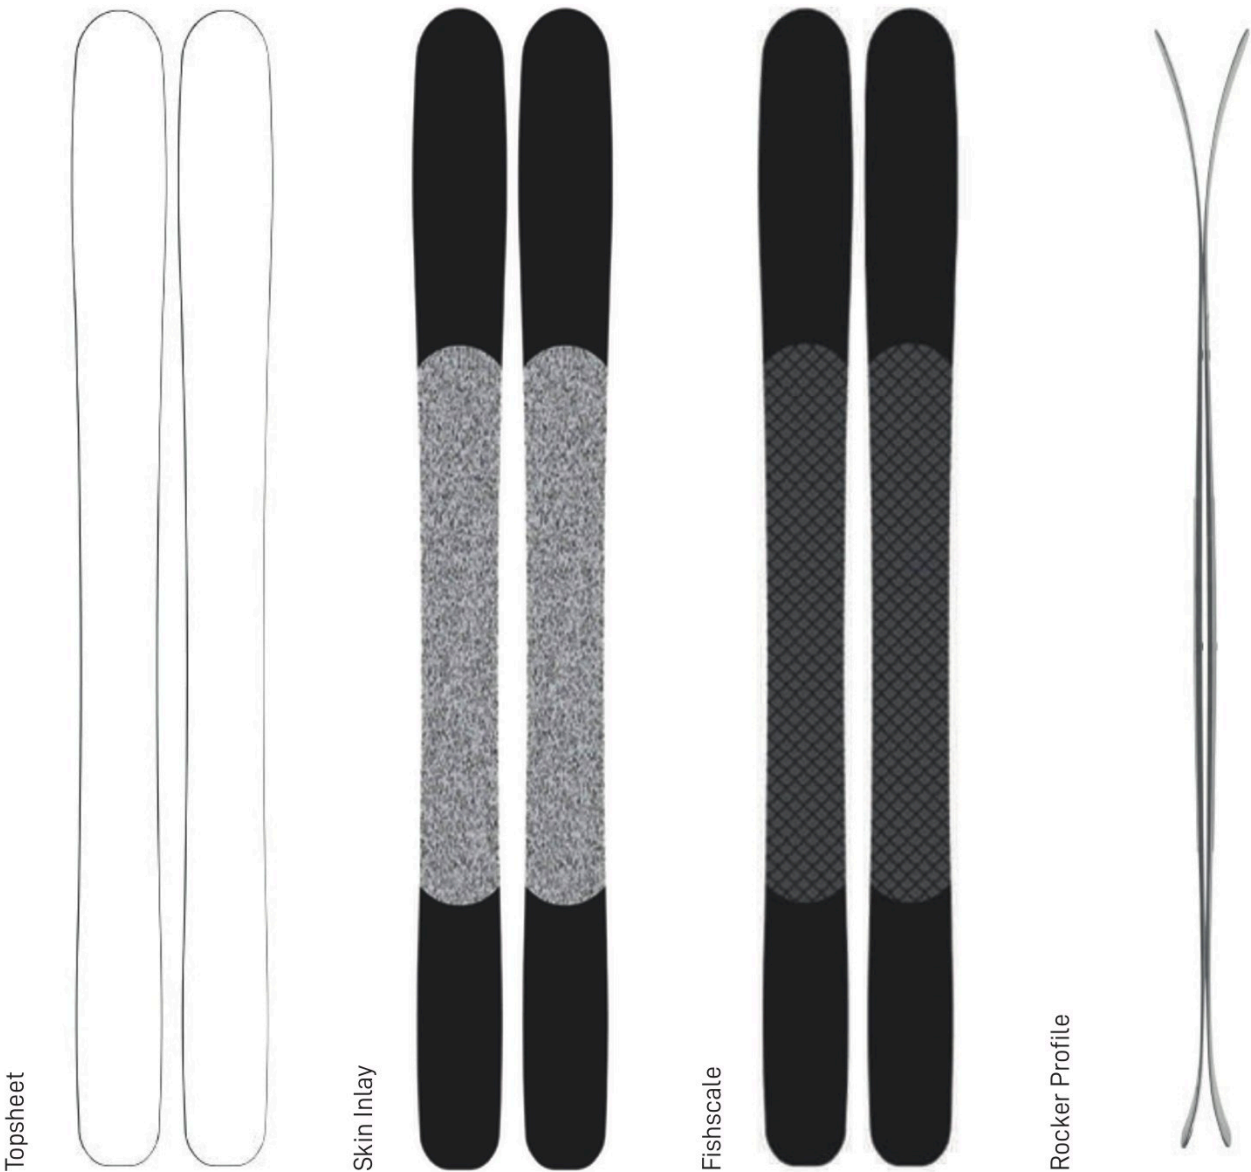

Manoeuvring through snow and ice in the extreme cold demands specialised hardware solutions such as cold weather skis.

Manufactured from durable materials to withstand harsh conditions, our selection of skis offer optimum traction and manoeuvrability, enabling troops to efficiently navigate difficult terrain with minimal excess energy expenditure.

OSM-COMBAT-DISTANCE (Over Snow Mobility - Assault)

Brand: DPS Skis
SKU: tbc

Skill Level: Low, no prior ski experience necessary.

Base Options: Fishscale, skin inlay

Sizes: 153cm

Dimensions: 129/100/114, 130/100/115

Boot: Universal, any standard issue cold weather boot, Vapor Barrier boot, Lundhags.

Binding: NNN-BC, Hagan X-Trace, Nordigrip, or similar.

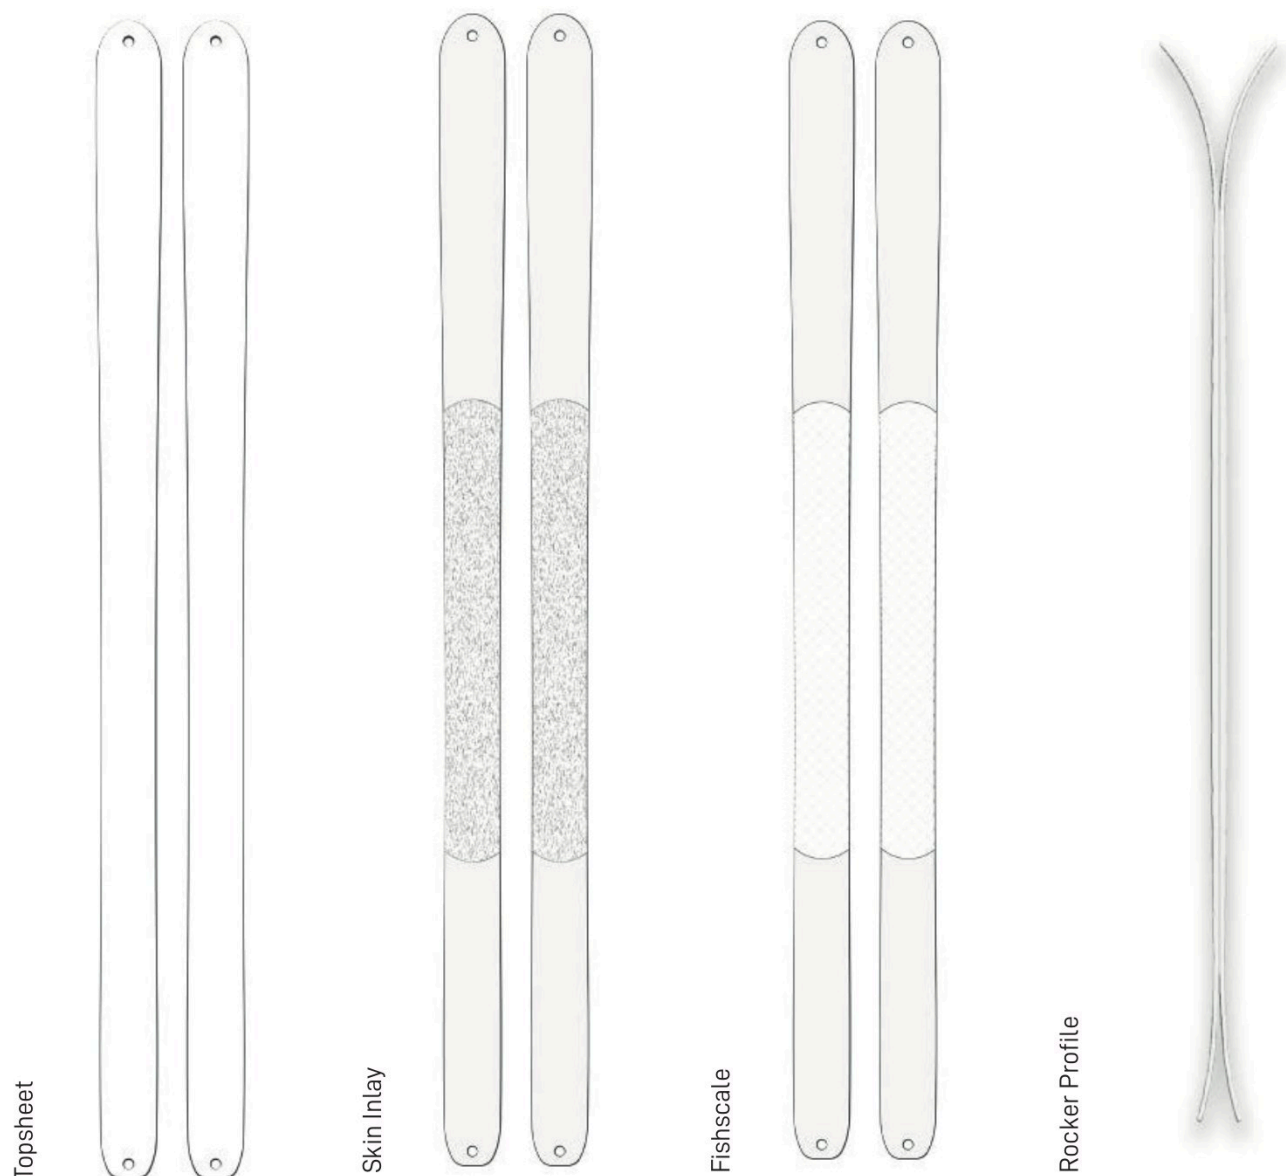

Purpose: For fast and efficient dismounted mobility over flat to rolling terrain. Excels in tighter quarters, brush, and forest. Easily maneuverable.

Mission Set: SOF without mountainous terrain, conventional forces, large troop movements, support elements, scouts, point patrol, reconnaissance elements. Requires minimal skiing ability.

Skis: Short, highly maneuverable walking ski. The skis feature a fishscale or semi-permanent skin inlay base. More stable than OSM-COMBAT-DISTANCE. Faster and more efficient than snowshoes. Full skin available for transition to steeper terrain or pulling very heavy loads. (pulk, sled, etc). Treated with permanent PHANTOM Glide for service free performance.

OSM-COMBAT-DISTANCE (Over Snow Mobility - Distance)

Brand: DPS Skis

Skill Level: Medium, some ski experience necessary.

Base Options: Fishscale, skin inlay

Sizes: 184cm, 195cm

Dimensions: 104/87/91, 99/82/87

Boot: Universal, any standard issue cold weather boot, Vapor Barrier boot, Lundhags.

Binding: NNN-BC, Hagan X-Trace, Nordigrip, or similar.

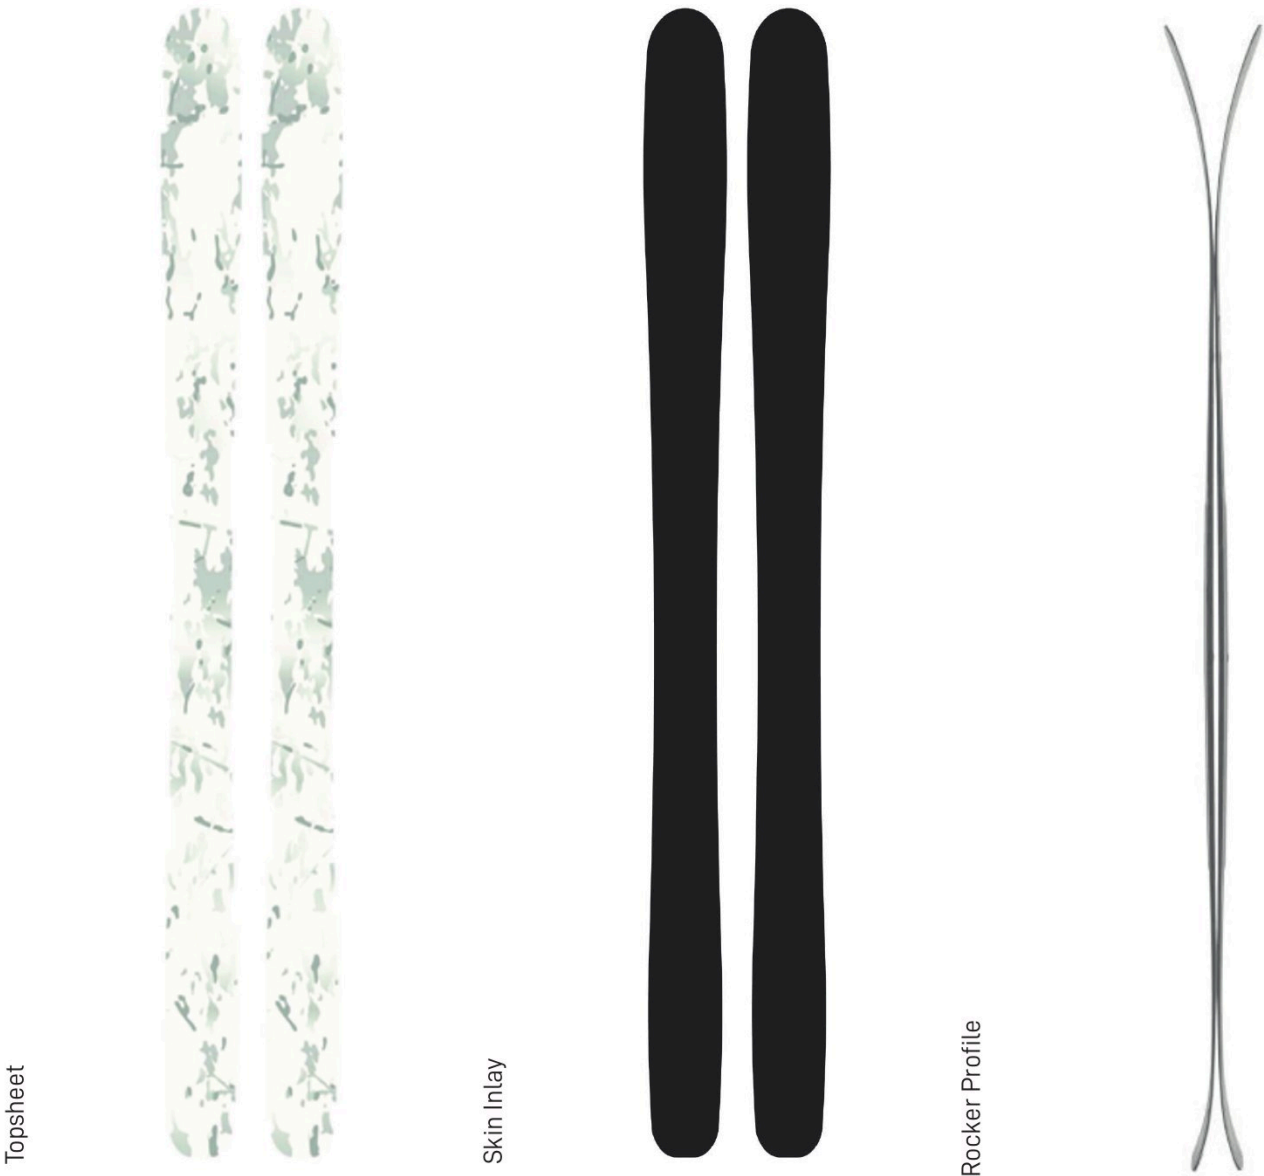

Purpose: Dismounted mobility, covering long distances, pulling loads, and fast travel over flat to moderately rolling terrain.

Mission Set: SOF in the absence of steep mountainous terrain, conventional forces for troop movement, support elements, scouts, point patrol, reconnaissance / over-watch elements.

Skis: Skis feature a fishscale or semi-permanent skin inlay base. Full skins are available for transition to steeper terrain or pulling very heavy loads. (pulk, sled, etc). Turned up tail for retreat, supple, rockered, pre-curved shovel for breaking trail, floatation, and max fore-aft stability. Treated with permanent PHANTOM

OSM-COMBAT-MAT (Military Alpine Touring)

Brand: DPS Skis

Skill Level: High

Base Options: Wolrd Cup alpine race base

Sizes: 153cm, 163cm, 171cm, 179cm, 184cm

Dimensions: 129/100/114, 130/100/118 131/100/116, 130/100/115, 129/100/114

Boot: Plastic Alpine Touring boot, the same boot recreational skiers use for backcountry skiing. Heavy weight but offers the most downhill control.

Binding: ATK Releasable Alpine Touring binding with lockable heel for controlled descent.

Purpose: Ascend and descend steep mountainous terrain.

Mission Set: Special Operations Forces (SOF), scouts, point patrol, reconnaissance / overwatch, sniper elements

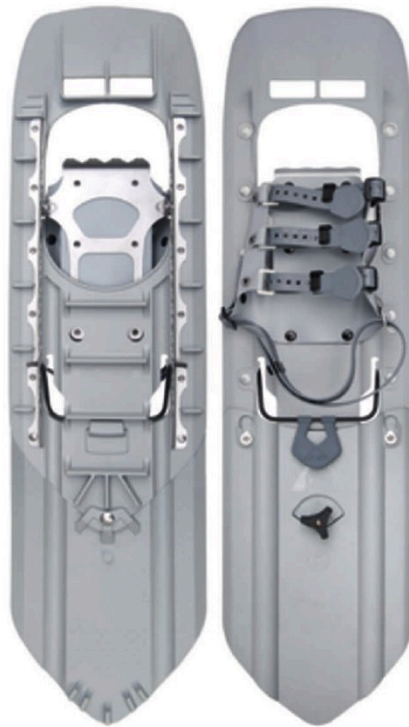

Skis: DPS Carbon Pagoda Tour 100, Alpine Touring ski, like a traditional downhill ski but lighter. Fitted with climbing skins for ascending. Treated with permanent PHANTOM Glide for service free

IBEX 84 TACTIX FOLDING SKI

Brand: Elan
SKU: ADPGAS19170

- Unique folding action
- Light wood core
- Comes with Ibex Tactix Army G3 bindings ION 12
- Steel edges
- Width: 106-84.4-118mm
- Weight: 1900g (with plate)

MILITARY DENALI (ASSAULT) SNOWSHOES

Brand: MSR
SKU: 335201

- Offer incredible performance on ice and snow covered terrain
- Steel traction bars with integrated saber teeth and hardened crampons are perfect for icy conditions
- Televator heel lifts make steep climbing a breeze
- Modular 4- or 8-in. tails can be quickly changed depending on snow or load conditioned

MILITARY LIGHTENING ASCENT SNOWSHOES

Brand: MSR
SKU: 13665

- The pinnacle of ultralight and aggressive all-terrain performance
- Ballistic-grade decking for long lasting durability 360°
- Traction frames with perimeter teeth and steel DTX crampons for edge-to-edge grip
- Assault Snowshoe bindings are made of comfortable freeze-resistant mesh that wraps around boots for a secure pressure-point free hold and precise foot placement
- Ergo Televator heel lifts make tackling steep slopes easier

EVO EXPLORE SNOWSHOES

Brand: MSR
SKU: 13718

- Get durability, comfort and performance from the Evo Explore snowshoes
- The tough Unibody deck and steel traction rails provide reliable grip
- Paradigm bindings are secure, comfortable and easy to use, even with gloves on
- They are field repairable and minimise heel drift for confidence on variable terrain
- Ergo Televator heel lifts make tackling steep slopes easier

SNOW SHOES

Brand: Snowmotion
SKU: 101707-178

- Fully moulded plastic platform
- Symmetrical bindings/no right or left footed snowshoe to ease logistics
- Binding has solid heel cap to easily pull it over the back of the boot and only two straps to quickly fasten the binding
- Crampons in steel and powder coated
- Weight: 1630 grams per shoe

DYNALOCK EXPLORE POLES

Brand: MSR
SKU: 10238

- Compact three-section aluminium poles feature strong 7075 aluminium lower section for increased durability
- Easy DynaLock adjustability with tool-free tensioning and extended EVA foam grip for added comfort
- Winter and summer baskets included

MILITARY DYNALOCK TRAIL POLES

Brand: MSR
SKU: 14322

- Two-section aluminium poles for maximum durability, simplicity and support
- Easy to use DynaLock adjustability with tool-free tensioning
- Ergonomic grip and adjustable wrist straps.

VERTICAL MOVEMENT

CLIMBING EQUIPMENT

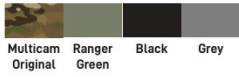

Specialised climbing equipment which is intelligent, adaptable and fit-for-purpose will make all of the difference for personnel navigating a sheer rock face in the extreme cold.

Proper use and understanding of the necessary equipment is crucial when undertaking any type of climb, especially when operating in a dangerous environment.

HCMH II HARNESS

Brand: Helix Tactical
SKU: HC40_

Modular full body harness system for Air, Mountain, Maritime & Urban operations. The Helix Combat Multi Harness (HCMH) v2 is a fully modular tactical harness system that has been developed over several years with significant end user input and trials.

DESIGN FEATURES

- Specifically designed for military/law enforcement operational use
- Modular system provides a wide range of functionality, reduces training time and replacement cost
- Full system comes 1 x riggers belt, 2 x gear loops, 1 x set of leg loops, 1 x chest harness, 2 x perfecto carabiners, 1 x fifi hook, 1 x XSRE lock captive bar, 1 x chest ascender, 1 x storage bag, 1 x user instructions
- Fully integrates with in-service 'on the man' equipment
- It can be used as a standalone EN358 riggers belt, an EN 1277 waist harness or an EN 361 full body harness
- NSN Code 4240-99-368-8659
- Size S-XL

CLIMBING HARDWARE

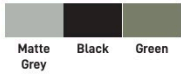

High-quality climbing hardware is a non-negotiable for anyone contemplating an outdoor ascent. Referring to the specialised equipment that is used by climbers to protect, anchor and belay during rock climbing and similar activities, these items enable the wearer to create secure anchor points and protect themselves in the event of a fall.

Specialised carabiners, lightweight collapsible ladders, tactical hooks and pole systems and state-of-the-art protective headgear are just some of the items necessary when planning a climb.

APEX ICE AXE

Brand: Helix Tactical
SKU: A028

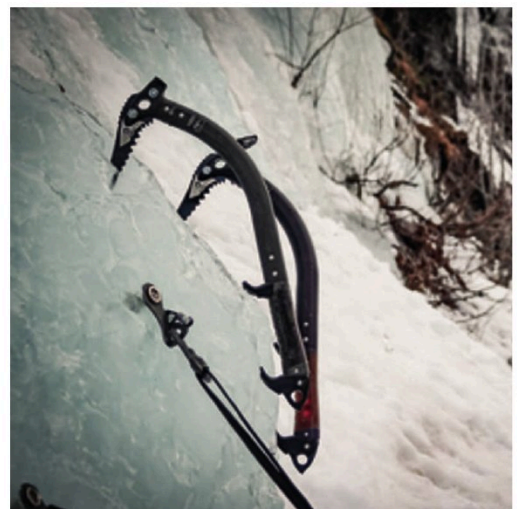

Despite its aggressive appearance, the Apex is comfortable across a wide variety of terrain. The shaft curve has been precisely designed to give clearance and stability on steep ground while remaining effective when plunging, daggering and moving on easier angled snow slopes.

Design Features

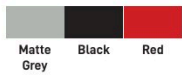

- 50cm Technical climbing axe - fully T rated in both adz & hammer options
- Dual handrests for leashless climbing
- Removable pick weights allow customisable balance
- High clearance shaft maximises performance on steep terrain
- Full strength clip in point allows use of axe as an anchor
- Supplied with grippy grip tape for extra handle grip and insulation
- Shafts and picks T rated for durability
- Picks laser cut from steel for strength and CNC'd for high performance in frozen turf and ice
- Interchangeable picks for improved performance on either ice or mixed terrain
- Spike gives security on low angled snow slopes

SUSTAINMENT

SHELTERS

Our range of military-specific tents and shelter systems are robust and durable, designed to withstand the most extreme weather conditions.

Enhanced tear strength and revolutionary light-blocking fabric ensure that tents are both strong and discreet, providing the ideal shelter in which to recuperate, plan and prepare for the next tactical move.

KERON 4GT TACTICAL

Tactical Green SKU: 010314

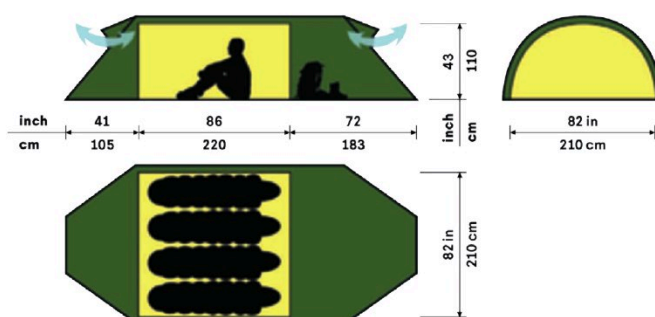

Tactical White SKU: 010316

The construction of the Keron 4GT, like other Hilleberg tents, has the ability to leave the inner connected to the outer this makes it much quicker to erect and drop. Internally it is set out to allow for four adults to sleep alongside each other as well as small features such as well-positioned mesh pockets and a drying line enable a better living and working environment.

DESIGN FEATURES

- 4 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- The optimal blend of maximum space, strength, flexibility and comfort
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- Linked but separable inner and outer tent for simultaneous pitching
- Tunnel design requires only four pegs for pitching, and the simple, single opening continuous sleeve and pole tensioner system is quick to pitch and remarkably stable
- The outer and inner tents can be used separately
- Vestibule area: 3.3 m² x 1.6m²
- Poles (10mm) 4 x 368 cm
- 22x Y-pegs
- Height: 110cm
- Weight: 6.4 kg

KERON 4 TACTICAL

Tactical Green SKU: 010114

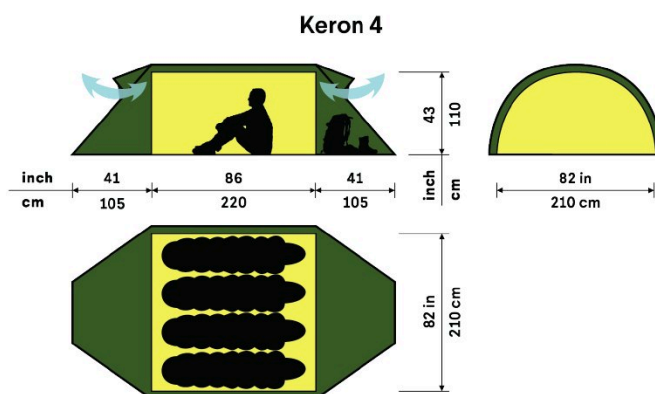

Tactical White SKU: 010116

When we first introduced the Keron, it quickly became, and remains today, the standard tent for polar expeditions because of its superb durability, excellent stability in high winds, roomy interior, and simplicity. These same traits have made Keron and Keron GT models ongoing favourites of anyone wanting a tent that is exceptionally sturdy yet relatively light in weight, that will work for any situation, and that will handle many years of use.

DESIGN FEATURES

- 4 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- Plenty of room for three or four occupants and their gear
- Linked but separable inner and outer tent for simultaneous pitching
- Tunnel design requires only four pegs for pitching, and the simple, single opening continuous sleeve and pole tensioner system is quick to pitch and remarkably stable
- Dual entrances and vestibules ensure that one door can always be situated out of the wind and provide flexible entry/exit and storage options
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The outer and inner tents can be used separately.
- Height: 110cm
- Area: 4.6m²
- Poles (10mm) 3 x 368 cm
- Weight: 5.5kg

KERON 3GT TACTICAL

Tactical Green SKU: 010614

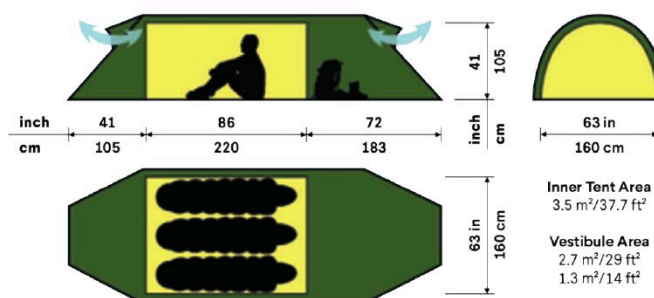

Tactical White SKU: 010616

The construction of the Keron 4GT, like other Hilleberg tents, has the ability to leave the inner connected to the outer this makes it much quicker to erect and drop. Internally it is set out to allow for four adults to sleep alongside each other as well as small features such as well-position mesh pockets and a drying line enable a better living and working environment.

DESIGN FEATURES

- 3 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- The optimal blend of maximum space, strength, flexibility and comfort
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- Linked but separable inner and outer tent for simultaneous pitching
- Tunnel design requires only four pegs for pitching, and the simple, single opening continuous sleeve and pole tensioner system is quick to pitch and remarkably stable
- The outer and inner tents can be used separately
- Vestibule area: 2.7 m² x 1.3m²
- Poles (10mm) 4 x 328 cm
- 22x Y-pegs
- Height: 105cm
- Weight: 5.8 kg

KERON 3 TACTICAL

Tactical Green SKU: 010414

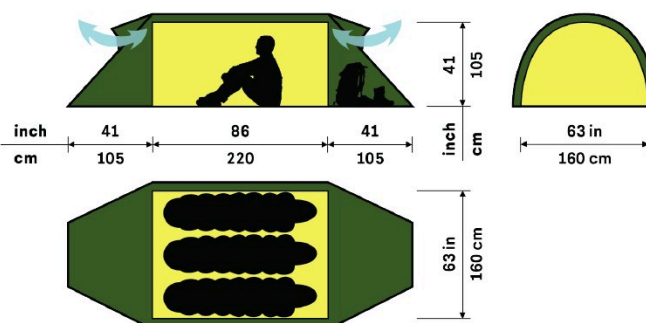

Tactical White SKU: 010416

When we first introduced the Keron, it quickly became, and remains today, the standard tent for polar expeditions because of its superb durability, excellent stability in high winds, roomy interior, and simplicity. These same traits have made Keron and Keron GT models ongoing favourites of anyone wanting a tent that is exceptionally sturdy yet relatively light in weight, that will work for any situation, and that will handle many years of use.

DESIGN FEATURES

- 3 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- Plenty of room for three or four occupants and their gear
- Linked but separable inner and outer tent for simultaneous pitching

- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The outer and inner tents can be used separately.
- Height: 105cm
- Area: 3.5m²
- Poles (10mm) 3 x 328 cm
- Weight: 4.9kg

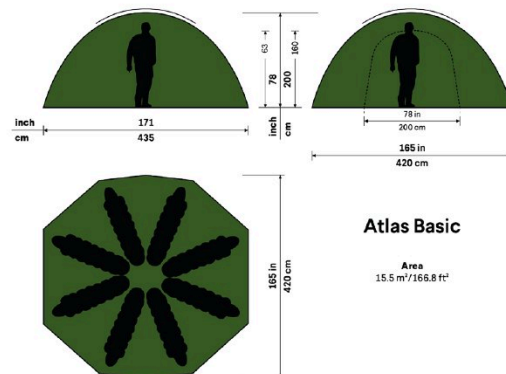

ATLAS BASIC TACTICAL

Tactical Green SKU: 015114
Tactical White SKU: 015116

Tremendously spacious, very stable and completely modular, the Atlas is the ideal big group tent for any situation. It appeals to large, backcountry groups of all types, from mountaineering expeditions needing a highly reliable, spacious base camp tent to military units looking for large, easily portable spaces for sleeping and group gathering. The Atlas can be used in its Basic form, with no inner tent or floor, or it can be customized as needed with a variety of options.

- 8 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Tremendously spacious, very stable and completely modular
- Separate vent cover protects open vents from snow and rain
- Adjustable roof vents can be closed with snow proof panels, and are accessible from inside of the tent
- Freestanding design provides very good stability and snow load handling as well as full standing height inside
- Lower vents afford increased air circulation
- Dual entrances are of nearly full standing height for excellent access
- Height: 200cm
- Area: 15.5m²
- Poles (17mm) 2 x 768, 2 x 668, 1 x 620 cm poles (9mm) 1 x 212 cm pole
- Inner tent not included
- Weight: 12kg

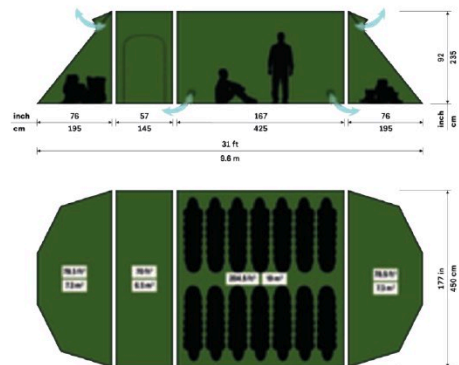

STALON XL BASIC TACTICAL

Tactical Green SKU: 016614
Tactical White SKU: 016616

Designed with professional use in mind, the Stalon XL can be configured in nearly endless ways. It can serve as a classroom for adventure outfitters; a mobile medical station, command centre, or staging/briefing room for search and rescue teams; or as a field dormitory for any large group. Each module of the tent can be zipped on or off to accommodate the needs of the user, and multiple modules can be easily connected or disconnected as necessary.

- 14 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Adjustable vents on the ends are backed with adjustable no-see-um mesh and air-permeable snow-proof panels, both of which are accessible from inside the tent
- Adjustable vents have "bag" openings, and include both tent fabric and mesh layers. Openings can accommodate ducting from forced air heating or cooling units
- Modular construction: optional connector allows multiple tents to be connected at the extension's door
- Height: 235cm
- Area: 40.1 m2
- Poles (17mm) 10 x 720 cm Pole
- Inner tent not included
- Weight: 28kg

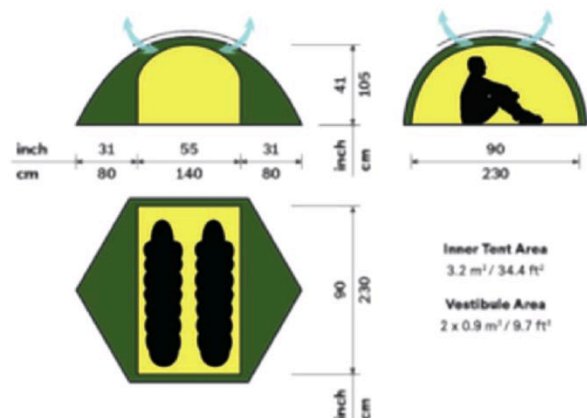

STAIKA TACTICAL

Tactical Green SKU: 012114
Tactical White SKU: 012116

The Staika is all about simplicity, but simple in no way equals "sparse." Easy to pitch, immensely stable, spacious, and remarkably light, the Staika is an excellent "go to" tent for any use where sturdy, reliable strength is the high priority. It is a supremely stable base camp tent in all conditions and appreciate its simplicity and completely free standing construction as well as its comfort, roominess, and, of course, its robust strength.

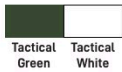

- 2 person tent
- Higher weight and a lower tear strength outer tent fabric than the standard version.
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Black guy lines
- Looped guy lines affixed to twin attachments on each side of each pole increase stability in poor conditions.
- High bathtub floor keeps out ground water
- 2 Integrated stowage pockets
- Full no-see-um mesh on inner tent door is covered by a zipper adjustable, fabric panel for all-season comfort
- Vestibules are integrated into the construction, resulting in a fully free standing tent
- Separate vent cover protects open vents from snow and rain
- Adjustable roof vents can be closed with snow-proof panels, and are accessible from inside the tent
- Large flaps protect zippers from the rain
- Height: 105cm
- Inner tent area: 3.2m
- Poles (10mm) 3 x 387 Poles
- Weight: 4.4kg

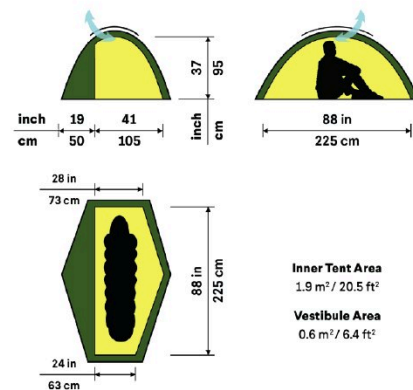

SOULO BL TACTICAL

Tactical Green SKU: 018314
Tactical White SKU: 018316

The Soulo BL is a robust all-season solo tent that is equally at home in harsh weather and mild conditions. In addition, its fully free-standing construction makes it ideal for tough pitching conditions. Easily strong enough for exposed mountain use, be that mountaineering, ski touring or ski mountaineering, it is also well suited for all around backpacking trips of any length and in any season, or anytime harsh weather is the norm. With its fully freestanding structure and compact footprint, the Soulo excels at tough pitching conditions.

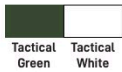

- 1 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Vestibule is integrated into the construction, resulting in a fully free-standing tent
- High bathtub floor keeps out ground water
- Dual guy lines on each pole, with the upper attachment loop designed to wrap around the pole, increase stability in poor conditions
- Adjustable roof vent can be closed with a snow-proof panel, and is accessible from inside the tent
- Separate vent cover protects open vent from snow and rain
- Flap protects the zipper from the rain
- Integrated stowage pocket
- A completely freestanding solo tent that is both remarkably light and expedition-ready
- Height: 95cm
- Inner tent area: 1.9m²
- Poles (10mm) 2 x 344, 1 x 285cm Poles
- Weight: 3.1kg

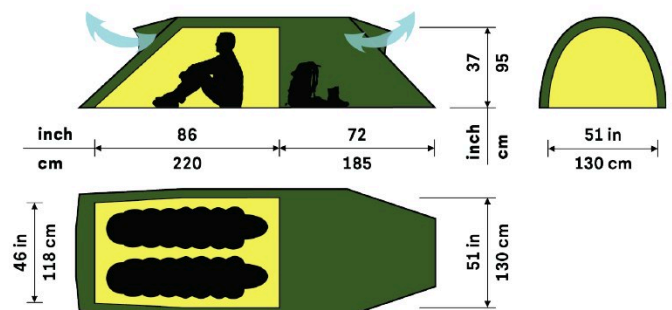

NAMMATJ 2GT TACTICAL

Tactical Green SKU: 011214
Tactical White SKU: 011216

The Nammatj GT is equally suited for a high altitude expedition or a weekend walk in the local hills. These robust all-season, all-rounders pitch quickly and easily, can be taken down and moved in a flash, yet are far stronger and lighter than any other tent in their class. Because of its superb strength to weight ratio and compact footprints, the Nammatj GT have become immensely popular with extreme users, such as polar travellers looking to save weight, mountaineers doing remote routes in the highest ranges, professional guides, and military special forces teams.

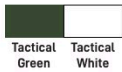

- 2 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- A single entrance and vestibule afford easy access and plenty of storage space, but keep the weight very low
- Separate vent cover protects open vent from snow and rain
- Linked but separable inner and outer tent for simultaneous pitching.
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- Height: 95cm
- Inner tent area: 2.8m²
- Poles (10mm) 2 x 293cm Poles
- Weight: 4.4kg

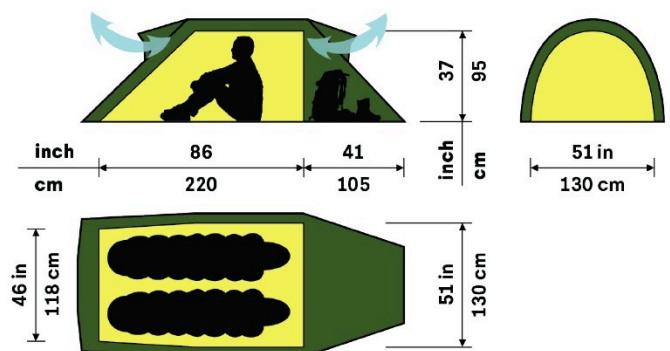

NAMMATJ 2 TACTICAL

Tactical Green SKU: 011014
Tactical White SKU: 011016

The Nammatj GT is equally suited for a high altitude expedition or a weekend walk in the local hills. Because of their superb strength to weight ratio and compact footprints, both the Nammatj and Nammatj GT have become immensely popular with extreme users, such as polar travellers looking to save weight, mountaineers doing remote routes in the highest ranges, professional guides, and military special forces teams.

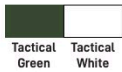

- 2 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- Plenty of room for two or three occupants and their gear
- Linked but separable inner and outer tent for simultaneous pitching
- Tunnel design requires only four pegs for pitching, and the simple, single opening continuous sleeve and pole tensioner system is quick to pitch and remarkably stable
- A single entrance and vestibule afford easy access and plenty of storage space, but keep the weight very low
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The inner tent can be replaced with a Mesh Inner tent
- Inner tent not included
- Height: 95cm
- Inner tent area: 2.8m²
- Poles (10mm) 2 x 293cm Poles
- Weight: 3.5kg

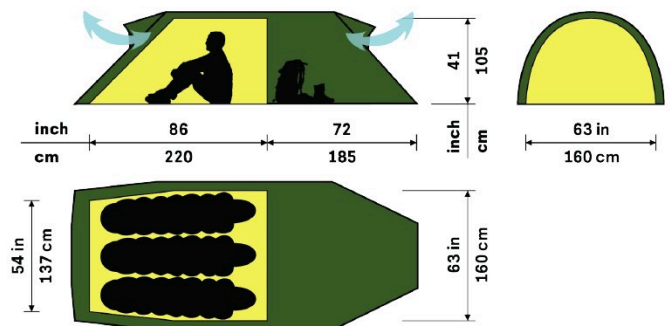

NAMMATJ 3GT TACTICAL

Tactical Green SKU: 012614
Tactical White SKU: 012616

The Nammatj GT is equally suited for a high altitude expedition or a weekend walk in the local hills. These robust all-season, all-rounders pitch quickly and easily, can be taken down and moved in a flash, yet are far stronger and lighter than any other tent in their class. Because of its superb strength to weight ratio and compact footprints, the Nammatj GT have become immensely popular with extreme users, such as polar travellers looking to save weight, mountaineers doing remote routes in the highest ranges, professional guides, and military special forces teams.

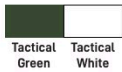

- 3 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 – 950 Nm
- A single entrance and vestibule afford easy access and plenty of storage space, but keep the weight very low
- Separate vent cover protects open vent from snow and rain
- Linked but separable inner and outer tent for simultaneous pitching
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- Height: 105cm
- Inner tent area: 3.4m²
- Poles (10mm) 2 x 328cm
- Weight: 4.8kg

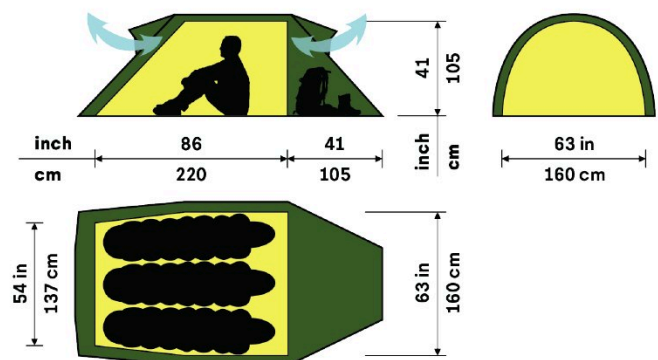

NAMMATJ 3 TACTICAL

Tactical Green SKU: 012514
Tactical White SKU: 012516

The Nammatj GT is equally suited for a high altitude expedition or a weekend walk in the local hills. Because of their superb strength to weight ratio and compact footprints, both the Nammatj and Nammatj GT have become immensely popular with extreme users, such as polar travellers looking to save weight, mountaineers doing remote routes in the highest ranges, professional guides, and military special forces teams.

- 3 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- Plenty of room for two or three occupants and their gear
- Linked but separable inner and outer tent for simultaneous pitching
- Tunnel design requires only four pegs for pitching, and the simple, single opening continuous sleeve and pole tensioner system is quick to pitch and remarkably stable
- A single entrance and vestibule afford easy access and plenty of storage space, but keep the weight very low
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The inner tent can be replaced with a Mesh Inner tent
- Inner tent not included
- Height: 105cm
- Inner tent area: 3.4m²
- Poles (10mm) 2 x 328cm
- Weight: 3.1kg

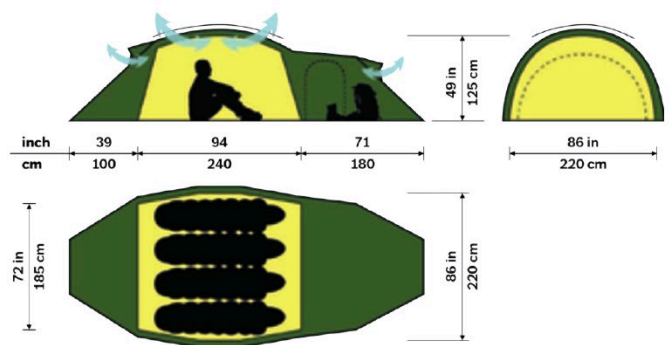

SAITARIS TACTICAL

Tactical Green SKU: 011914
Tactical White SKU: 011916

The Saitaris has a remarkably broad range of use thanks to its great strength and welcome roominess. Its dual vestibules provide excellent storage space for gear, while two entrances yield multiple entry and exit options for the greatest convenience. Those traveling in very extreme conditions will appreciate its strength and extra vestibule room. The robust self-supporting dome construction requires only the vestibules to be pegged out, and it can easily handle the most formidable winter storms, making the Saitaris an excellent basecamp tent.

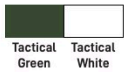

- 4 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Dome construction with multiple pole crossing points provide outstanding snow-load handling capability
- Plenty of room for four occupants and their gear
- Linked but separable inner and outer tent for simultaneous pitching
- Self-supporting dome design requires only the vestibules to be pegged, and the innovative full sleeve plus sleeve and clip pole system make for quick, easy set up
- Dual entrances and vestibules ensure that one door can always be situated out of the wind and provide flexible entry/exit and storage options
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The outer and inner tents can be used separately Pitching the inner tent alone requires optional pole holders
- Height: 125cm
- Inner tent area: 5m²
- Poles (10mm) 4 x 431cm and 1x 287cm
- Weight: 7.7kg

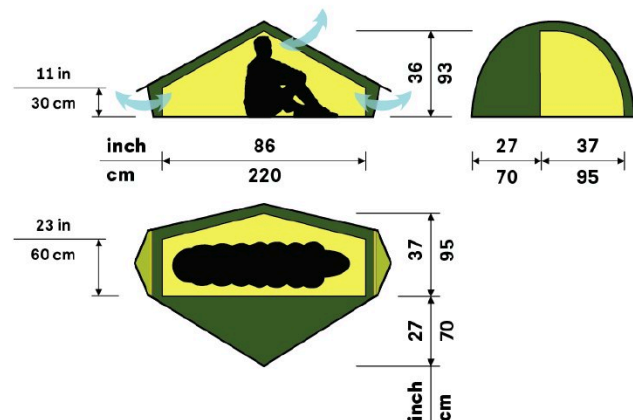

AKTO TACTICAL

Tactical Green SKU: 013814
Tactical White SKU: 013816

Although only slightly heavier than a bivy bag, the Akto offers near-luxury, all-season shelter for the solo traveller. The Akto includes a vestibule and a packed size small enough to fit into a side pocket on many packs. While it was not designed for extreme use, it has proven itself on extended polar expeditions, and so will stand up well to all conditions. Hikers, climbers, bicycle tourers and sea kayakers alike have embraced its lightweight roominess, and today it is being used in every climb, all over the world.

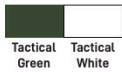

- 1 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys
- Plenty of room for one occupant and their gear
- Linked but separable inner and outer tent for simultaneous pitching
- Basic pitching requires only four pegs in the head and foot end guy lines, and the simple, single-opening, continuous pole sleeve and tensioner system is quick to pitch and remarkably stable (note: pegging out the four corners provides optimal floor space, venting and overall tent function and is highly recommended)
- The single entrance/single vestibule configuration affords easy access as well as storage space
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The outer and inner tents can be used separately Pitching the inner tent alone requires optional pole holders
- Height: 93cm
- Inner tent area: 1.7m²
- Poles (10mm) 2 x 293cm
- Weight: 2.1kg

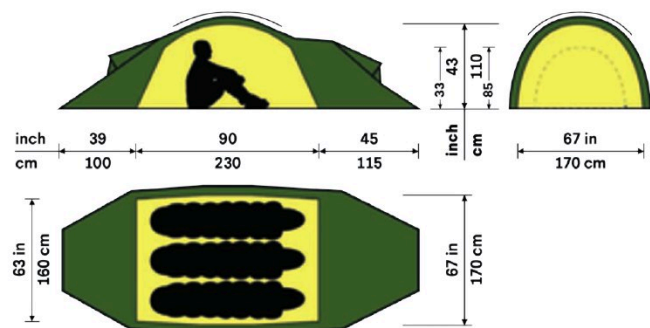

SAIVO 3 TACTICAL

Tactical Green SKU: 018814
Tactical White SKU: 018816

The Saivo 3's exceptional strength and remarkably massive interior volume make it the ultimate 3-person expedition base camp dome tent. Its new vestibule configuration – a large, standard-sized vestibule as well as an even larger one with an extra pole – provide even more comfort and plenty of storage room for gear-intensive trips. The Saivo has a self-supporting dome structure and its completely square interior floor plan offers flexibility for sleeping arrangements.

- 3 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Dome construction with multiple pole crossing points provide outstanding snow-load handling capability.
- Plenty of room for three or four occupants and their gear
- Linked but separable inner and outer tent for simultaneous pitching
- Self-supporting dome design requires only the vestibules to be pegged, and the innovative full sleeve plus sleeve and clip pole system make for quick, easy set up
- Dual entrances and vestibules ensure that one door can always be situated out of the wind and provide flexible entry/exit and storage options
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The outer and inner tents can be used separately
- Pitching the inner tent alone requires optional pole holders
- Height 110cm
- Inner tent area: 3.8m²
- Poles (10mm) 4 x 393 cm, 1 x 267 cm
- Weight: 6.5kg

SAIVO 4 TACTICAL

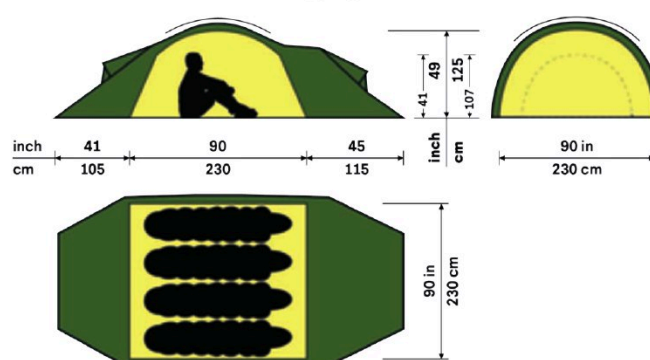

Tactical Green SKU: 018914

Tactical White SKU: 018916

The Saivo 4's exceptional strength and remarkably massive interior volume make it the ultimate 4-person expedition base camp dome tent. Its new vestibule configuration – a large, standard-sized vestibule as well as an even larger one with an extra pole – provide even more comfort and plenty of storage room for gear-intensive trips. The Saivo has a self-supporting dome structure and its completely square interior floor plan offers flexibility for sleeping arrangements.

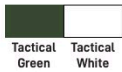

- 4 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Dome construction with multiple pole crossing points provide outstanding snow-load handling capability.
- Plenty of room for three or four occupants and their gear
- Linked but separable inner and outer tent for simultaneous pitching
- Self-supporting dome design requires only the vestibules to be pegged, and the innovative full sleeve plus sleeve and clip pole system make for quick, easy set up
- Dual entrances and vestibules ensure that one door can always be situated out of the wind and provide flexible entry/exit and storage options
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The outer and inner tents can be used separately
- Pitching the inner tent alone requires optional pole holders
- Height 125cm
- Inner tent area: 5.3m²
- Poles (10mm) 4 x 471 cm, 1 x 368 cm
- Weight: 7.9kg

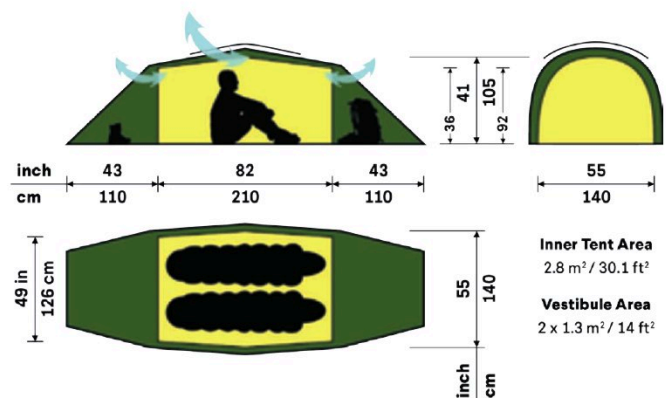

TARRA TACTICAL

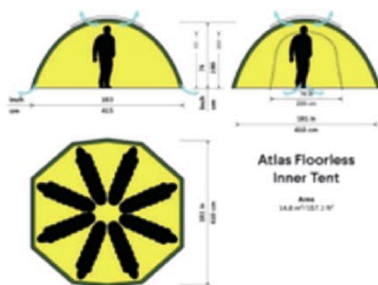

Tactical Green SKU: 013314
Tactical White SKU: 013316

Tarra was created as a hybrid "tunnel dome" model, with a tunnel tent's usable roominess and the static strength of a dome. The resulting boxy inner tent has near vertical walls, while the four pole structure boasts five crossing points for an exceptionally strong structure. The Tarra is simple to pitch, makes a fine base camp tent, and is fully capable of taking on the most challenging weather.

- 2 person tent
- 70 D ripstop nylon, polyurethane/silicon coating with 8 kg tear strength (ISO 13937-4)
- Light blocking
- IR reflectance 23 - 26% within 750 - 950 Nm
- Dome construction with multiple pole crossing points provide outstanding snow-load handling capability
- Linked but separable inner and outer tent for simultaneous pitching
- Self-supporting dome design requires only the vestibules to be pegged, and the straightforward short sleeve and clip pole system make for quick, easy set up
- Dual entrances and vestibules ensure that one door can always be situated out of the wind and provide flexible entry/exit and storage options
- An optional footprint covers the entire area of the outer tent, including the vestibules. It connects directly to the tent, and can be left attached during pitching
- The outer and inner tents can be used separately Pitching the inner tent alone requires optional pole holder
- Height: 105cm
- Inner tent area: 2.8m²
- Poles (10mm) 4 x 372cm
- Weight: 5.5kg

POLARIS MULTI-STOVE

Brand: Optimus
SKU: OPT8019408

Current Issue to Royal Marines in Arctic Norway, this versatile, award-winning stove takes nearly any fuel* you want to give it to make sure you have a warm meal anytime, anywhere, any weather. You get superior, reliable, one-jet cooking performance with no fiddling to change nozzles or attachments.

DESIGN FEATURES

- Fuel type: LPG Gas, White gas, Jet Fuel, Diesel, Kerosene
- Average burn time: Up to 100 min at maximum output (with 400 ml of fuel)
- Dimensions (mm): 140 × 80 × 65
- Average boil time for 1 L of water: Approx. 4 min/1 L, depending on climate, altitude etc.
- Output: 4200W
- Weight: 475g
- Kit includes: Stove, FLIPSTOP™ pump, multitool, windscreen, heat reflector, stuff bag, lubricant, user manual

XGK EX STOVE KITS

Brand: MSR

SKU:

11045 - Marine XGK Stove Combo

14333 - XGK Arctic Stove Kit

05802 - A Norwegian XGK Stove Kit

11816 - XGK Expedition Service Kit

For over 35 years, the MSR® XGK™ stove has been the world's most reliable extreme-condition stove; trusted by demanding end-users everywhere. The XGK line of stove kits continue that legacy with unrivaled performance, dependability and better multi-fuel burning capabilities than any other stove on the market. It features a flexible fuel line that allows it to pack smaller than ever, as well as stable, retractable legs and pot supports, and a powerful flame that melts snow and boils water incredibly fast. Tested on demanding expeditions for decades, the military line of XGK™ stoves provide unrivaled versatility and absolute dependability

DESIGN FEATURES

- Proven: No. 1 choice on expeditions worldwide
- Multi-Fuel: Reliably burns more liquid fuels than any other stove including JP-8, diesel, white gas, Naphtha, kerosene, etc
- Dependable: Easy to maintain; Shaker Jet™ cleans fuel jet with a simple shake
- Compact: Flexible fuel line allows stove to fit in a 1.5-liter MSR pot
- Performance: Boils 1 liter of water in just 2.8 minutes (Climate/altitude dependent and using kerosene fuel)
- Stability: Retractable legs and pot supports provide a secure platform for large pots
- Field Serviceable: Field maintainability and reliable durability make the XGK™ an excellent choice in no-fail military environments
- Kits Include: Fuel pump, fuel bottle(s), windscreen, heat reflector, field service kit, instructions, and Fuel-Proof stuff sack. (Exact contents for each kit are listed in the Cascade Designs Military Workbook)
- Weight: 380g – 580g depending on

PROTECTION /SAFETY

PROTECTION

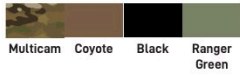

Extreme cold environments present unique challenges which are not just limited to freezing temperatures. When operating in the extreme cold, soldiers will experience strong winds and blizzards or whiteouts which pose potentially lethal hazards.

To ensure the safety, effectiveness and comfort of military personnel in such harsh conditions, specialised headwear and eyewear are essential.

EXFIL BALLISTIC SL

Brand: Team Wendy
SKU: 76-

The EXFIL® Ballistic SL features a lightweight composite shell providing a 15% weight reduction over the original EXFIL® Ballistic while offering the same unique EXFIL® shell geometry for optimal fit.

DESIGN FEATURES

- Polyethylene and other fibres in a proprietary composite matrix make up the shell
- Three-piece Zorbium® foam impact liner with 16 individual comfort pads in two thicknesses, all berry compliant materials
- Team Wendy® CAM FIT™ retention with BOA® Fit System for optimised stability and fit
- Wilcox® SL shroud for NVG mounts provides a 35% reduction in weight from EXFIL® Ballistic Wilcox® W shroud
- Glass-reinforced polycarbonate side accessory rails
- Ballistic Performance: NIJ Level III-A (according to NIJ STD 0106.01/0108.01)
- Fragment Performance: 17gr V50 $\geq$ 731 m/s (2400 ft/s)
- Weight: Complete system 1.01kg (Size 1)

M216 BACKCOUNTRY

Brand: Team Wendy

SKU: 83-

The M-216™ Backcountry helmet features a hybrid shell design; the ABS hard front shell provides reinforcement for mounted accessories, and an in-mold PC rear shell reduces weight.

DESIGN FEATURES

- A glass-reinforced polycarbonate shroud
- A customized BOA® fit system guarantees a precise fit adjustment with single-handed quick release
- Accessory rails
- Removable ear cups specifically designed to be comfortable while using in-ear communication systems with a pocket for drop-in audio device compatibility
- 14 total vents
- Eight adjustable crown vents with three positions (open, half open and closed) to accommodate both warm and cold conditions.
- Above goggle vent channels draw air through the helmet to the rear exhaust ports to reduce goggle fogging
- BS EN 1077:2007 Class B (Alpine Skiing and Snowboarding)
- Weight: 0.66kg

SNOW SAFETY

Venturing through hazardous terrain in extreme cold environments poses a litany of additional safety risks.

In avalanche-prone areas, our safety kits arm you with the essential tools which could mean the difference between life and death if the worst were to happen.

DIRACT AVALANCHE TRANSCEIVER

Brand: Ortovox
SKU: 11420

From beginners to experienced users: The DIRACT is intuitive, compact and with 3 antennas, it will reliably and quickly guide you to your buried companion in an emergency.

DESIGN FEATURES

- Stable easy-to-read display
- Simple one-button design
- Search Strip width: Max 50 meters
- 360° real-time display
- Audio and visual support for coarse and fine search
- Automatic switchover in case of a secondary avalanche
- Flag up to 4 avalanche victims
- Permanent self-testing and standby mode
- Updatable software
- Rechargeable lithium ion battery works reliably down to -20°C

BARRYVOX 2

Brand: Mammut
SKU: 2620-00370

The compact digital 3-antenna avalanche transceiver is essential in avalanche-prone terrain. It's intuitive to use, with a 70m range efficient search support features. To keep you safe on tour, the Barryvox 2 continuously checks its own operation with a self test function.

DESIGN FEATURES

- Easy-to-read display
- Can be operated while wearing gloves
- Effective digital search strip width: 70 meters
- Digital receiving range: 70 meters
- Easy to read even when wearing polarized glasses
- Reverse direction function to avoid 180-degree search errors
- Rescue SEND: Protective function in the event of a secondary avalanche, it automatically switches to SEND to allow rescuer to be located (In the event of the rescuer not moving for 4 minutes)
- Automatic self-test when switched on, checking transmit and search function
- Selection function for multiple burials: in the case of multiple burials, burials can be selected, marked and unmarked on a list
- Updatable software
- Battery Life: 450hrs on SEND on Alkaline batteries
- Operating temperature: -25 to +45 Celsius

SIGNATURE MANAGEMENT

SIGNATURE MANAGEMENT

With advancing detection technologies, signature management has become critical across all operational environments.

By minimising visual, thermal, infrared, and electromagnetic signatures, troops and equipment can reduce the risk of detection.

Adapting to modern sensors and surveillance ensures operational advantage, making effective signature management as essential as mobility and firepower, regardless of terrain or climate.

ARCTIC PONCHO

Brand: Ametrine
SKU: PN 7020-00-01_

Ametrine's Survival Blanket is part of Ametrine's modern survival solutions that assist survival, evasion, resistance, and escape (SERE).

The system combines the art of camouflage with the science of Multi-Spectral Signature Mitigation (MSSM) to meet end-user needs. The system can be used for static concealment of a person, tent, or firing position or worn as a poncho, with hand and leg grips securing the cover on the move. The cover provides comprehensive concealment from advanced adversary sensors operating in the visual and thermal bands.

Effective visual and thermal concealment is achieved by blending the target with the background rather than attempting to block the radiation emitted by the target (body heat).

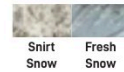

DESIGN FEATURES

- Multilayered, lightweight ripstop materials
- Materials and patterns optimized for day and night on reversible sides
- Effective in high wind conditions
- Zippered neck
- Stretch cord hood adjustment using cohesive cinch tabs
- Zippered openings for helmet accessories
- Compactly packed into a small pouch
- Lightweight, Breathable
- Quick drying, Water repellent
- Weight 620g

ARCTIC JACKET AND OVERPANTS

Brand: Ametrine
SKU: PN 705_-00

Ametrine's Multilayered Arctic Jacket & Overpants concealment system is produced from a combination of two layers to maximize performance against visual and thermal sensing. They are available in two snow patterns, matching fresh or snirt snow.

The outside is optimized for daylight conditions, while the inner side, made of a permeable, water-repellent ripstop material, is optimized for night use. Together, they deliver the highest performance in Multi-Spectral Signature Mitigation (MSSM), reducing thermal signature across a wide spectrum, from UV, VIS, I2R and SWIR, to MWIR and LWIR.

The jacket has large sleeves and a hood that maximize concealment of the head and face without compromising the fit and function of the helmet.

DESIGN FEATURES

- Multilayered, lightweight ripstop materials
- Materials and patterns optimized for day and night on reversible sides
- Effective in high wind conditions
- Zippered neck
- Stretch cord hood adjustment using cohesive cinch tabs
- Zippered openings for helmet accessories
- Lightweight, Breathable
- Quick drying, Water repellent
- Weight 580g

SURVIVAL BLANKET

Brand: Ametrine

SKU: PN 9021-00

Ametrines' Survival Blanket is part of Ametrine's modern survival solutions that assist survival, evasion, resistance, and escape (SERE).

The system combines the art of camouflage with the science of Multi-Spectral Signature Mitigation (MSSM) to meet end-user needs. The system can be used for static concealment of a person, tent, or firing position or worn as a poncho, with hand and leg grips securing the cover on the move. The cover provides comprehensive concealment from advanced adversary sensors operating in the visual and thermal bands.

Effective visual and thermal concealment is achieved by blending the target with the background rather than attempting to block the radiation emitted by the target (body heat).

DESIGN FEATURES

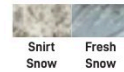

- Evasive Blanket Size: 2.2 x 1.7 m'
- Different visual Patterns on reversible sides (optional)
- Top zipper (two pulls) plus front zipper (two Pulls)
- Two cords cohesive shrinkage mechanism (elastic cords with folded Velcro pullers)
- Head opening with neck shrinkage and two pulls
- Waist shrinkage with two waist closures
- Sides snap for internal and external connections
- Six strings, each 1.2 m' long, for anchoring
- Two leg grips + two hand grips
- Lightweight, Breathable
- Quick drying, Anti - Microbial

ARCTIC HIDE SITE

Brand: Ametrine

SKU: PN 3061-00-01_

Ametrine's multispectral signature-reducing management Modular Hide Site (MHS) provides an effective hide site for combat teams by employing hemispheric, multispectral concealment.

The integral structure offers a large space for the combat team, observation equipment, and weapon firing. The outer cover uses two ripstop materials on reversible sides, optimizing concealment in daylight and nighttime operations.

The kit includes a waterproof floor and shape-breaking packs used to break man-made outlines using the outer mounting mesh; together, they effectively match the surroundings and minimize ground disturbance.

DESIGN FEATURES

- Multi-layered cover for daylight and nighttime
- Concealment in UV, VIS, IIR to IR Wavelength
- Non-infra-red reflective (IRR) fabric
- Unidirectional see-through material
- Four shape-breaking packs
- External mounting net
- Coated polypropylene fabric floor
- Lightweight, Breathable
- Quick drying, Water repellent
- Weight: 9kg

UAVs

Unmanned Aerial Vehicles (UAVs) have become a cornerstone of modern warfare, reducing risk to life and unlocking new levels of tactical advantage.

AI-enabled and payload-adaptable, today's UAVs offer smart solutions for almost any mission. Whether it's heavy-lift logistics, GPS-denied indoor ops, or rugged ISR tasks, there's a platform ready to deliver.

The battlefield is evolving and UAVs are leading the way.

ANAFI UKR

Brand: Parrot
SKU: tbc

TECHNICAL SPECIFICATIONS

AIRCRAFT

- Size folded: 245 x 160 x 116 mm (9.6 x 6.3 x 4.6")
- Size unfolded: 350 x 665 x 116 mm (13.8 x 26.2 x 4.6")
- Mass: 959 g (2.11 lb)
- Maximum take-off mass (MTOM): 1,450 g / 3.20 lb
- Maximum transmission range:
 - MARS Radio*: 15 km / 9.32 mi
 - LoRa: 20 km / 12.43 mi
- 5G*: range without limits
- Maximum flight time: 38 min at 6 m/s airspeed
- Maximum flight distance: 23.1 km (14.35 mi) at 10 m/s airspeed
- Maximum horizontal airspeed: 17 m/s
- Maximum horizontal groundspeed: 12.6 m/s
- Maximum ascent and descent speed: 8 m/s
- Maximum wind resistance:
 - During flight: 15 m/s
 - During take-off and landing: 15 m/s
- Maximum propeller speed: 8,500 rpm
- Sound power level at 1 m (3 ft): 77 dBA
- Service ceiling: 5,000 m above MSL (Mean Sea Level)
- Operating temperature: -36 °C to +50 °C (-33 °F to +122 °F)
- No take-off temperature limitation if battery is maintained between -20 °C and +50 °C (-4 °F to +122 °F)
- IP53: rain and dust resistant
- No NFZ (No-Fly Zones) limitation
- Takes off from / lands in the hand of the operator
- Full capability in GNSS-Denied flight conditions
- Indoor flight
- MicroSD card slot
- Deployment time: < 2 min

SENSORS

- Satellite navigation: GPS, GLONASS, Galileo & BeiDou
- Barometer and magnetometer
- Front and stereo cameras, and vertical range sensor
- 4 x 6-axis IMU (3-axis accelerometers + 3-axis gyroscopes) (Flight IMU: ICM-40609-D)

CYBERSECURITY

- Zero data shared without user consent
- Manage your data privately between drone and device or share anonymous data on secured European servers
- SD card AES-XTS encryption with a 512-bit key
- Digitally signed firmware
- Compliant with FIPS140-2

RADIO LINK

- MARS*(Radio-jamming resistance through Frequency Hopping)
- Encrypted backup LoRa radio
- 5G*
- Wi-Fi*
- Direct video stream resolution: 1080p at 30 fps
- AES 256 encryption: packet and radio level

IMAGE CHAIN

- IR IMAGE CHAIN
- Sensor: FLIR BOSON
- Resolution: 640 x 512 px
- Temperature range: -40 °C to +250 °C (-40 °F to +482 °F)
- Thermal sensitivity: ≤60 mK
- Measured IR wavelength range: 8 to 14 micrometers
- Video resolution: UHD (2160p) at 8.6 fps
- Video format: MP4 (H.264 / H.265)
- Photo formats: JPEG

EO IMAGE CHAIN

- EO IMAGE CHAIN
- 2 sensors: 1/2.4"
- Digital zoom: 35x
- Electronic shutter speed: 1/25 s to 1/10,000 s
- ISO range: 100 - 3,200
- Video resolution: 4K / FHD / HD
- Video format: MP4 (H.264 & H.265)
- Photo resolutions:
 - Wide: 21 MP (84° FOV)
 - Rectilinear: up to 16 MP (up to 75.2° FOV)
- Photo formats: JPEG, DNG (Digital NeGative RAW)

IMAGE STABILIZATION

- 3-camera IR/EO stabilized gimbal:
 - Hybrid: 3-axis
 - Mechanical: 3-axis
- Electronics (EIS): 3-axis
- Controllable gimbal tilt range: -90° to +90°

SMART BATTERY

- Size: 136 x 73 x 46 mm (5.4 x 2.9 x 1.8")
- Mass: 344 g / 0.76 lb
- Type: High density LiPo (227 Wh/kg)
- Capacity: 6,800 mAh
- Voltage (nominal): 11.55 V (3 x 3.85 V cells)
- Charges fully in 2 h 30 min with the USB-PD
- Maximum charging power: 45 W

EBEE VISION

Brand: AgEagle
SKU: tbc

TECHNICAL SPECIFICATIONS

DRONE SPECIFICATIONS

- Wingspan: 47.2in/120cm
- Material: Expanded Polypropylene (EPP)
- Weight: 35lbs/ 1.6kg
- Transport Case: Backpack and Hardcase

FLIGHT PERFORMANCE

- Cruise Speed: 30mph/45mph
- Max Speed: 45 mph (72km/h or 20m/s)
- Max Wind Resistance: 38 mph (61km/h or 17m/s)
- Max Flight Time: 90 mins
- Service Temperature: -10°C, +49°C

REMOTE CONTROLLER SPECIFICATIONS

- Screen: 7" sunlight viewable screen with rain mode and glove touch
- Video: Continuous HD video feed from RGB and thermal sensors
- Battery: 5 Hours battery life with warm- swap capability

RGB SENSOR SPECIFICATIONS

- Sensor: 2 Sensors 1/2.4"
- Resolution: 5344 x 4016
- Focal Length 4mm/16mm
- Field of View: 72° - 45° / 21° - 12°
- ISO Range: 100-3200
- Zoom: 1x -4.8x/4.9 - 32x digital
- Video Resolution: 1920 x 1080
- Video Format: MP4 (H.264)

THERMAL SENSOR SPECIFICATIONS

- Sensor: FLIR BOSON
- Resolution: 640 x 512
- Focal Length 18mm
- Field of View: 24° - 19°
- ISO Range: -
- Zoom: 15x digital
- Video Resolution: 1280 x 720
- Video Format: MP4 (H.264)

TALON DT-300

Brand: Rotron

The Talon is a fully electric, easily deployable, vertical take off and landing, payload delivery system that can be reloaded and re-used time and time again. Rotron's fully automated twin rotor aircraft is unlike anything the industry has seen before, reducing the cost and maximising the impact. It has a proven range of 70km carrying its maximum 30kg payload, more than twice that of an equivalent payload VTOL drone.

DESIGN FEATURES

- UK Manufacturer
- Reusable and proven to fire munitions already at the front line
- Built for long range cargo and munitions delivery up to 30kg
- Fully automated large twin rotor forward transitional lift and with no energy wasted on the tail rotor
- Operational by a single soldier with basic training
- Control authority in high winds
- IP67 waterproof rated
- Utilised industry standard user interface combined with custom software and hardware
- Extended flight times by 200% compared to other VTOL craft
- Operated in high cross wind environments due to high thrust to weight ratio
- Rotor size: 3m
- Max payload: 30kg
- Max Speed: 57mph
- Range Max Payload: 74km

Agnostic Drone Controller

Managing multiple digital interfaces across various UAV platforms is a demanding task, even for the most skilled operators, adding unnecessary complexity and cognitive load in high-pressure environments.

The solution? A universal control platform that consolidates systems, streamlines workflows, and empowers personnel to operate with greater efficiency and focus.

SROC TAB 5

Brand: UXV Technologies

The SRoC (Soldier Robotic Controller) series by UXV Technologies stands at the forefront of innovation as a tactical handheld controller for defense robotics and unmanned systems operating in challenging environments. Engineered for robustness, reliability, and advanced functionalities, the SRoC serves as a ruggedized ground control station. It offers a standardized, highly adaptable solution by interfacing with our cutting-edge Swappable Radio Modules (SRM) and the Nett Warrior connector. The SRM design allows operators to easily interchange radio modules and in addition to its internal battery, the SRoC supports two Swappable Battery Modules (SBMs) for easy power expansion. Its user-centric design not only ensures a seamless experience but also delivers an immersive interface, emphasizing control and safety for operators.

TECHNICAL SPECIFICATIONS

MECHANICAL

- Finish: Soft touch coated ABS
- Weight: 2.33 lbs/ 1060g
- Weight excl Tablet: 1.38 lbs/ 630g
- Dimension: 11.10 x 5.11 x 2.55 inches/ 282 x 140 x 65 mm
- Mounting: Chest Mount Available

ELECTRICAL

- Charging: USB-C (Tablet only) Nett Warrior (Tablet + Attached accessories)

HUMAN INTERFACES

- Front Side: 1 x 5D Joystick, 2 x 2 - Axis Hall-effect joystick, 4 x push buttons, 12 x bezel buttons
- Backside: 2 x operator presence buttons
- Top: 2 x 1 - Axis joystick, 2 x push buttons with flip guard

SECURITY

- Trusted Boot: ARM TrustZone (Build-In)
- Functional Safety: Add on board optional

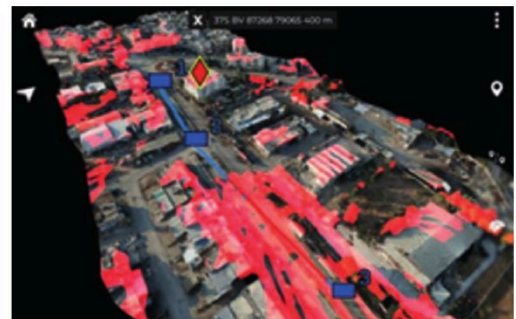

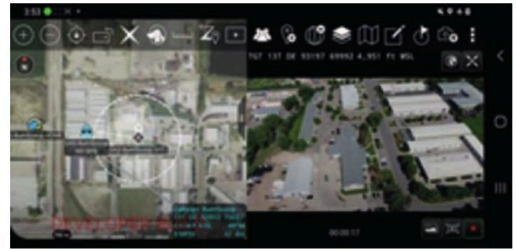

Environmental

- Built to Standards: MIL-STD-810-H
- Ingress Rating: IP65
- Compliance: CE, ROHS complaint
- Operational Temperature: -20 C to + 50 C (Charging above 10 C only)

FARSIGHT

Brand: Reveal
SKU: 11199

This software gives the user the ability to produce near real time 3D models, all edge processed on the end user device whilst in the field. With this software you will have the ability to view enemy line of sight, plot routes, measure heights and distances and plot multiple HLS to name a few. This software is compatible with most drones currently available from the Black Hornet all the way up to a Predator.

DESIGN FEATURES

- Real-time 2D mapping
- Near real-time 3D modelling
- Route planning
- AI route planning
- Enemy line of sight analysis
- Helicopter landing zone surveying
- Route terrain analysis and graphics
- AI measurement tool
- ATAK integration
- HLZ detection capability
- HLZ obstacle Identification

Power Management

Advancing technological capabilities present a huge expansion in opportunities for today's soldiers. However, every item of electronic brilliance is bound by its power source, a limitation which has traditionally been mitigated with a litany of spare batteries, cables and charging apparatus.

Working in partnership with global leaders in cutting-edge technology, our power management solutions hold the answer to this conundrum.

NSPA CONTRACT ITEMS

ORDERING THROUGH NSPA

The NATO Support and Procurement Agency (NSPA) provides a streamlined and reliable way for NATO nations and partner organisations to purchase approved products and equipment. By ordering through NSPA, customers benefit from centralised contracts, assured quality standards, and simplified procurement processes.

Products available via NSPA can be ordered through the NATO Logistics Stock Exchange (NLSE) using the NSPA E-Portal.

Simply log in, reference the relevant contract number, and submit your request directly through the system. This ensures efficient delivery and full compliance with NATO procurement requirements.

WOOLTERRY JACKET (UNISEX)

Brand: Aclima

SKU: Tbc

DESIGN FEATURES

- Inside: Knitted WoolTerry including cuffs
- Flat seams
- 20,5 micron
- Fit: Regular
- Layer: 2nd Wool Layer
- Material: 70% Wool, 30% Modacrylic

WOOLTERRY CREW NECK M'S

Brand: Aclima

SKU: 108466

DESIGN FEATURES

- Inside: Knitted WoolTerry including cuffs
- Flat seams
- 20,5 micron
- Fit: Regular
- Layer: 2nd Wool Layer
- Material: 70% Wool, 30% Modacrylic

WOOLTERRY POLO M'S

Brand: Aclima

SKU: 111222

DESIGN FEATURES

- Inside: Knitted WoolTerry including cuffs
- Flat seams
- 20,5 micron
- Fit: Regular
- Layer: 2nd Wool Layer
- Material: 70% Wool, 30% Modacrylic

WOOLTERRY LONGS M'S

Brand: Aclima

SKU: 111130

DESIGN FEATURES

- Inside: Knitted WoolTerry including cuffs
- Flat seams
- 20,5 micron
- Fit: Regular
- Layer: 2nd Wool Layer
- Material: 70% Wool, 30% Modacrylic

POLARIS MULTI-STOVE

Brand: Optimus
SKU: OPT8019408

Green

DESIGN FEATURES

- Fuel type: LPG Gas, White gas, Jet Fuel, Diesel, Kerosene
- Average burn time: Up to 100 min at maximum output (with 400 ml of fuel)
- Dimensions (mm): 140 x 80 x 65
- Average boil time for 1 L of water: Approx. 4 min/1 L, depending on climate, altitude etc.
- Output: 4200W
- Weight: 475g
- Kit includes: Stove, FLIPSTOP™ pump, multitool, windscreen, heat reflector, stuff bag, lubricant, user manual

SNOW SHOES

Brand: Snowmotion
SKU: 101707-178

White

DESIGN FEATURES

- Fully moulded plastic platform
- Symmetrical bindings/no right or left footed snowshoe to ease logistics
- Binding has solid heel cap to easily pull it over the back of the boot and only two straps to quickly fasten the binding
- Crampons in steel and powder coated
- Weight: 1630 grams per shoe

G14

Brand: Grivel
SKU: Tbc

Black

DESIGN FEATURES

- Activities: classical and technical mountaineering/ ice climbing/ dry tooling
- Materials /construction / technologies: forged steel, steel, plastic
- Certification: CE EN 893, UIAA 153
- Weight: 1.158 g/pair (Cramp-O-Matic EVO); 1.154 g/pair (New-Matic EVO)
- Sizes: 36-47
- Antibott: front and rear

G12 NEW MATIC

Brand: Grivel
SKU: RAG12.NME

Black

DESIGN FEATURES

- Activities: glacier walking/ classical and technical mountaineering
- Materials / construction / technologies: steel, plastic
- Certification: CE EN 893, UIAA 153
- Weight: 1.012 g/pair (Cramp-O-Matic EVO); 1.006 g/pair (New-Matic EVO); 964 g/pair (New-Classic EVO)
- Sizes: 36-47
- Antibott: front and rear
